FOCUS ON INJECTIONS & ULTRASONOGRAPHY TREATMENTS

This 2 day VIP **hands-on class** is dedicated to learning and improving your **anatomy skills & injection treatments** by applying the newest training resources such as **ultrasonography and simulator injections**.

Handheld, portable or fixed **ultrasound equipments** will be discussed and compared through an in-depth review by worldwide experts.

The **ifaceSimulator** model used within the **F.A.S.T. method** is an innovative 3D printed design used for teaching and learning, in the field of anatomy & injection techniques and threads, a close to real-life experience, applicable for all levels of knowledge.
